

**Enal Razvi**  
Industry Analyst

Dr. Enal Razvi is currently a biotechnology business development consultant based in the San Francisco Bay Area. In this capacity, Dr. Razvi analyzes a number of different market spaces in biotechnology and assists companies in market analysis, business development, and commercialization operations.

Previously, Dr. Razvi served as Vice President of Business Development at DiscoverX Corporation in Fremont, California. Before DiscoverX, at LJL BioSystems (Sunnyvale, CA), Dr. Razvi served as Senior Director of Business Development and played a major role in developing LJL BioSystems' SNP genotyping business. Subsequent to the acquisition of LJL BioSystems by Molecular Devices Corporation, Dr. Razvi ran Molecular Devices' Genomics business. Prior to LJL, while at Frost & Sullivan, Dr. Razvi served as Director of their Drug Discovery Consulting business.

Dr. Razvi holds a doctorate in biomedical sciences, and completed post-doctoral work at The Rockefeller University in New York and at Harvard Medical School.
