

David McDowell

Team Leader, Lab of the Government Chemist Ltd

David McDowell is a Business Development Manager within the Life and Food Sciences Division of LGC, Europe's leading provider of analytical and diagnostic services and reference standards.

David obtained his PhD from Warwick University in 1990 in the area of DNA analysis and manipulation related to *Bacillus thuringiensis*. He joined LGC in 1991 where he was involved in the development of HyBeacons, a novel fluorescent probe chemistry compatible with PCR, and now focuses on the commercialization of the technology. HyBeacons are currently being used within LGC to deliver services in a number of areas including pharmacogenetics.
